

LOGOS DEMYSTIFIED

Ryan Carson

CUSTOM LIBRARY

Fundamentally, Logos is a digital library. Bibles, commentaries, study aids, and books from your favorite Christian authors, are made easily accessible to you by way of your phone, tablet, or personal computer.

It's easy to lose sight of the astounding volume of helpful resources that are available to you in Logos. The more familiar you become with them, the more confidently you will navigate your Bible study and teaching preparation.

HOW TO MAXIMIZE YOUR LIBRARY

Macro Level // What exactly do I own?

- What kinds of books?
- How many within each category?
- Get familiar with the titles and authors

Micro Level // Testing, rating, prioritizing

- Compare commentaries on a passage
- Compare dictionary/encyclopedia entries on a topic
- Compare lexicons on Greek and Hebrew words

RESEARCH ASSISTANT

In an instant, Logos is able to scan every word on every page in every book on every shelf of your library. It then pulls just the right books off the shelf and opens them to just the right pages based on your search criteria.

Word studies, passage studies, topical and contextual studies are made ridiculously quick and simple. This gives you more time to prayerfully consider the content, rather than flipping through indexes and tables of content, hoping you'll find something useful.

HOW TO MAXIMIZE YOUR RA

Tools

- Invest a little time each day to learn about one of the 37 tools currently available in Logos 8.
- "Pin to top" your favorite Tools for quick and easy access.

Guides & Workflows

- The Passage and Topic Guides are your bread and butter. Master these and you'll become a Logos Pro in no time.
- Workflows are good training in hermeneutics. Fun to play around with.

INSIGHTS STORAGE SYSTEM

One of the coolest features of Logos is that you can catalogue every insight, making them easy to re-discover when you return to that passage or topic at a later date. Day by day, you can essentially build your own running commentary based on books you've read, sermons you've heard, or insights you've gleaned from your own study.

HOW TO MAXIMIZE YOUR INSIGHTS

- Build your own personal commentary using **Notes**.
- Build your own topical index using **Passage Lists**.
- Catalogue all memorable quotes on a passage or topic using **Clippings**.
